ADVISORY ACTION

This Advisory Action is in response to the After Final Amendment that was filed on November 10, 2005.

The proposed amendments will not be entered because they raise new issues that would require further consideration and search. In particular, the amendments further define what steps are included with underwriting, such as calculating a value of each asset included within the first portion of the portfolio wherein underwriting includes analyzing an asset in accordance with predetermined criteria and determining a current purchase price for buying the asset and a confidence factor associated with the determined purchase price based on the analysis, what steps are included with grouping and underwriting a sample of assets, such as calculating a value of each asset included within the second portion of the portfolio based on the underwritten sample assets, each sample asset having descriptive attributes common to at least one nonsample asset included within the second portion such that each sample asset represents at least one non-sample asset included within the second portion, and what steps are included with using the computer to statistically infer a value for assets, such as using an iterative process including grouping the assets included within the third portion of the portfolio into clusters based on underwriting values and variances of the first and second portions of the portfolio.

Therefore, the amendments raise new issues that were not considered during the prosecution and search history and would further require a new search strategy.
